

Bokka Mohan Kiran

mohankiran07@protonmail.com

[in](#) mohankiran07 | [SoulByte07](#)

KEY SKILLS

- **Cloud & Infrastructure:** AWS (EC2, S3, RDS, VPC, Lambda, CloudFront, CloudWatch), Terraform
- **CI/CD & Containers:** Jenkins, Docker, Podman, Buildah, Docker Compose
- **Automation & Scripting:** Bash, Python, Linux, Rclone
- **Database & Analytics:** SQL, PostgreSQL, MySQL, Pandas, PowerBI

PROJECTS

AWS Scalable Web Architecture (Vocal4Local Migration) [🔗](#)

AWS (Route 53, CloudFront, ALB, ASG, RDS Multi-AZ), Terraform

- Migrated a legacy monolithic application to a 3-tier AWS architecture using Terraform, ensuring high availability and fault tolerance through Multi-AZ redundancy.
- Secured application and database logic using private subnets and AWS WAF, achieving robust network isolation and edge protection.
- Implemented CloudFront global edge caching to optimize performance and reduce latency for international customers.

Jenkins CI/CD Containerized Pipeline [🔗](#)

Jenkins, Buildah, Podman, Python, Docker, Linux

- Engineered end-to-end CI/CD automation pipelines for Flask applications, streamlining build, test, and deployment stages.
- Implemented daemonless container workflows using Buildah and Podman, enhancing environment security by eliminating Docker socket dependencies.
- Provisioned reproducible development environments using Docker Compose to standardize local Jenkins stack deployments.

AWS Lambda Stopinator – Automated EC2 Cost Control [🔗](#)

AWS Lambda, EventBridge, IAM, Python 3.11

- Automated EC2 instance scheduling using AWS Lambda and EventBridge, eliminating idle resource expenses and enforcing operational cost discipline.
- Configured least-privilege IAM policies for Lambda execution roles, ensuring secure API-level resource management and compliance.
- Replaced manual instance management with a cloud-native serverless solution, improving reliability and reducing manual intervention.

Highly Available Multi-AZ VPC Network Infrastructure [🔗](#)

AWS VPC, IGW, NAT Gateway, EC2, Bash

- Deployed a fault-tolerant Multi-AZ VPC architecture on AWS, establishing secure network isolation across public and private subnets.
- Automated web server provisioning using Bash User Data scripts, ensuring consistent and rapid infrastructure deployment.

IPL Cricket Data Analytics & Visualization [🔗](#)

Python (Pandas), Jupyter Notebook, PowerBI

- Performed exploratory data analysis on IPL datasets using Python (Pandas), identifying key performance trends and player statistics for data-driven insights.
- Built interactive PowerBI dashboards to visualize match outcomes, enhancing stakeholder reporting and visual storytelling.

EDUCATION

B.Tech in Computer Science and Engineering [SRKR Engineering College, Andhra Pradesh, India](#)

CGPA: 8.7

CERTIFICATIONS

- **AI-Powered Cloud Engineer & AWS Cloud Fundamentals** – EduSkills Foundation
- **CyberSecurity & Software Testing** – NPTEL
- **Advanced SQL** – HackerRank | **Google Project Management** – Coursera
- **Data Analysis & PowerBI** – EdX
